

## Konrad Lewandowski

*I am a former soldier with a seven year experience in military service. Over the years I have acquired many traits that have shaped me to be a resilient, hard working and reliable person. Immunity to stress, determination in goal achievement, professionalism and availability are only few of my assets. For the past year I have focused on obtaining and expanding my skills in the field of web development. Frontend, backend, data bases and external API's are some of the technologies I have made myself familiar with. I would gladly join a team of developers, from whom I can learn and further expand my knowledge while working to achieve common objectives.*

### Contact

E-mail:

[konrad.lewandowski92@gmail.com](mailto:konrad.lewandowski92@gmail.com)

GitHub:

<https://github.com/KonradLewandowski>

Phone:

**+48 666 960 130**

Date of birth:

**04.11.1992**

City:

**Gdansk**

Proficient:

**JavaScript | Node | Express | SASS  
| HTML&CSS**

Familiar:

**React | Hooks | TypeScript | Git |  
MongoDB | PostgreSQL | Gulp |  
Pug.js**

Basic knowledge of:

**Redux | Firebase**

### Languages

English - **B2**

Polish - **native**

### My projects(programming experience):

#### Portfolio website

A fully responsive one-page layout portfolio, with a simple and clean design.

Used technologies: **React | TypeScript | Styled-components**

Links: [Live Demo](#) | [YouTube](#)

#### Recipes

An application, that utilizes a Rest API, where you can search with over a million recipes and create your own.

Used technologies: **HTML&CSS | JavaScript | API | Parcel**

Links: [Live Demo](#) | [YouTube](#)

#### Calories calculator

A fully functional fullstack web application, which can create a new user, log in and log out with the JWT authentication. Resetting the password via a link sent by email. Adding a new product and searching an existing in the database. Manipulating user data. Store user's data on the server.

Used technologies: **HTML&CSS | JavaScript | Pug.js | Node | Express  
| MongoDB | Mongoose | Nodemailer | Parcel**

Links: [Live Demo](#) | [YouTube](#)

#### Map Workout

A little application, that uses OpenStreetMap API.

Used technologies: **HTML&CSS | JavaScript | API | Leaflet**

Links: [Live Demo](#) | [YouTube](#)
